PWA-360 360° Water Alarm

Additional Features

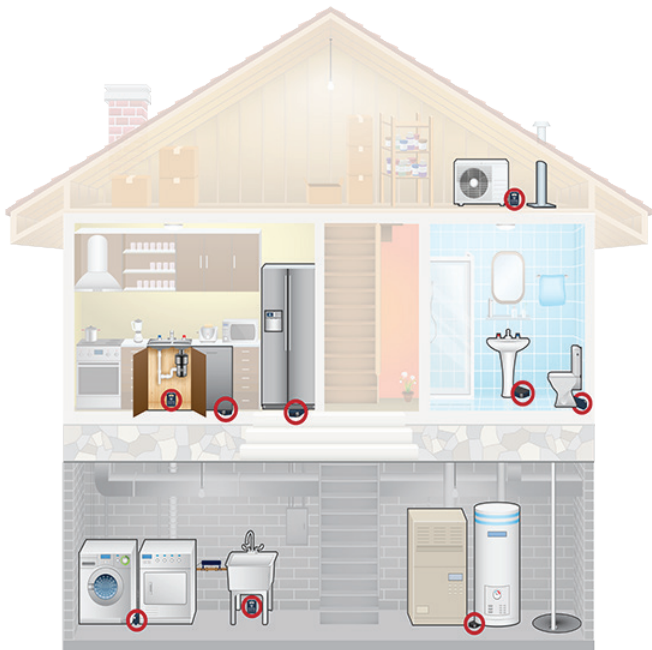

- Waterproof to ensure the device works when it counts
- Save money by detecting leaks early, heading off costly water damage and mold
- Solid-state circuitry is both very sensitive and reliable
- Only uses power from the battery when the alarm is sounding, extending battery life

Specifications

- 2 $\frac{3}{8}$ " W x 1"D x 3 $\frac{1}{4}$ "H
- 0.2 lbs. (24 grams)
- Solid-state
- Waterproof
- Runs on 9V battery

Placement

Protect your home from costly repairs by placing water alarms where water may leak, such as:

- under a sink
- near a washing machine
- by a water heater
- next to an attic AC unit
- behind the refrigerator
- under a laundry tub
